Model **SLAD/FREE-FLO/PRO-JET** LINEAR DIFFUSERS CONFIGURATION

S

DIFFUSERS

PRODUCT FEATURES

- Refer to specific SLAD / Free-Flo / Pro-Jet model documentation for dimensional and cross-sectional details
- Individual linear sections are available up to 72" standard lengths
- Linear runs longer than 72" will utilize multiple sections with alignment strips to maintain a linear appearance.
- Diffusers are manufactured as Center or End sections based on placement of removable end caps
- Mitered Corners are fully-welded, inactive components
- Configuration S must include Order Lengths A, B, C and Angles #1, #2 as measured at the centerline of the diffuser. Angle limitations may apply – contact factory.
- Each removable end cap adds 1/16" to the overall diffuser neck length (see detail A).

DETAIL A

QUANTITY	TAG#	A	B	C	ANGLE #1	ANGLE #2

All dimensions are in inches.
