CONVEX (X) APPLICATIONS
PRODUCT FEATURES

- Installed on **CONVEX** ceilings / walls / surfaces
- Field adjustable pattern controllers to change air discharge direction from horizontal to vertical projection (no integral volume control)
- Any single piece diffuser must have a constant radius (R_c)
- Diffusers with arc lengths greater than 120" will be provided with center and / or end sections
- Refer to the applicable Free Flo submittal sheets for dimensional details, border type, ceiling opening requirements
- Can be used for supply or return applications
- Contact factory for other configurations not shown - slot width, # slots, frame type
- Opening Arc Length = Diffuser Arc Length + 1/2"

Surface Frame Models (S)

- FF-C-S-10-1-X 1" Slot Width, 1 Slot
- FF-C-S-10-2-X 1" Slot Width, 2 Slots
- FF-C-S-15-1-X 1-1/2" Slot Width, 1 Slot
- FF-C-S-15-2-X 1-1/2" Slot Width, 2 Slots

Plaster / Mud Frame Models (BF)

- FF-C-BF-10-1-X 1" Slot Width, 1 Slot
- FF-C-BF-10-2-X 1" Slot Width, 2 Slots
- FF-C-BF-15-1-X 1-1/2" Slot Width, 1 Slot
- FF-C-BF-15-2-X 1-1/2" Slot Width, 2 Slots

 (RETURN MODELS WITHOUT PATTERN CONTROLLER: **FFR** REPLACES **FF**)

**HOW TO SPECIFY CONVEX
DIFFUSER DIMENSIONS**

DIFFUSER DIMENSIONS

TAG:	Arc Length	Chord Length	Radius	Rise	Angle
	L_c	C_c	R_c	B_c	A_c

IMPORTANT: ONLY 2 OF THE 5 DIMENSIONS SHOWN ARE REQUIRED TO DEFINE DIFFUSER CURVATURE

All dimensions are in inches.

CALCULATING CURVING DIMENSIONS

DIFFUSER DIMENSIONS	IF YOU KNOW:
<p>Any 2 of the following 5 dimensions define the required curving for the diffuser. These dimensions reference the diffuser at the mounting surface:</p> <p><u>Example:</u></p> <p>Lc = ARC Length Lc = 102.64"</p> <p>Rc = RADIUS Rc = 130.00"</p> <p>Cc = CHORD Length (< Diameter) Cc = 100.00"</p> <p>Bc = RISE Bc = 10"</p> <p>Ac = ANGLE, degrees Ac = 45.24°</p>	<p>Cc & Bc : $R = (C^2 + 4B^2) / (8B)$ $A = 2 \times \text{Arcsin}(C/2R)$ $L = .017453 \times R \times A$</p> <p>Lc & Rc : $A = 57.296 \times L / R$ $C = 2 \times R \times \text{Sin}(A/2)$</p> <p>Lc & Ac : $R = L / (.017453 \times A)$ $C = 2 \times R \times \text{Sin}(A/2)$</p> <p>Cc & Rc : $A = 2 \times \text{Arcsin}(C/2R)$ $L = .017453 \times R \times A$</p>

All dimensions are in inches.
