

APPLICATION

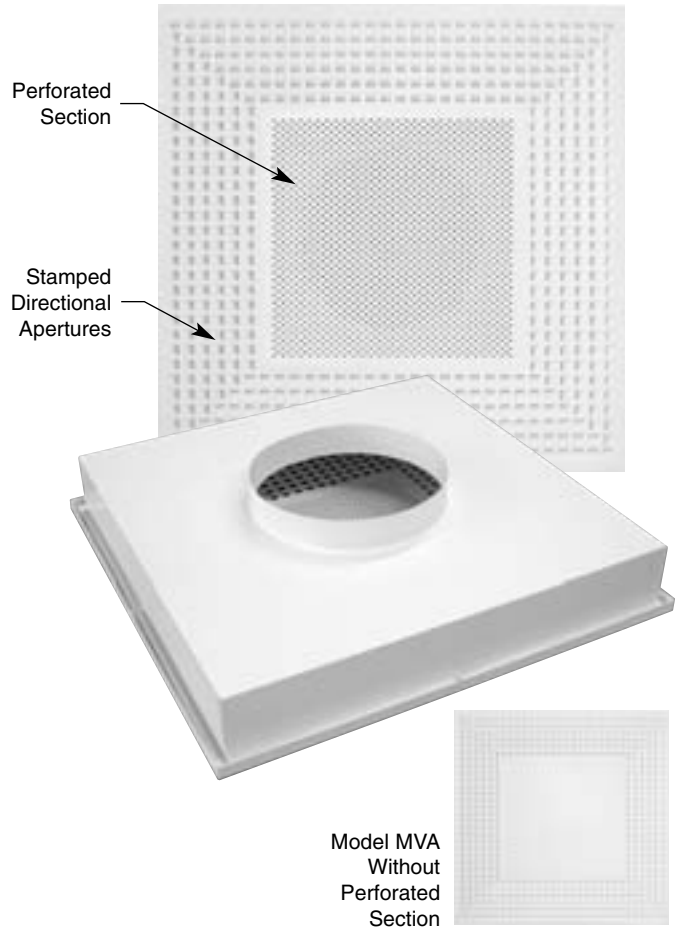

- High capacity supply air diffuser with short throw distances
- Ideal for high density occupancy such as trading floors
- Premium appearance designed by Architects
- Recommended for constant or variable air volume heating, cooling, or ventilating
- Nominal 24 x 24 module size
- Lay-in T-bar or 9/16" narrow slot suspended grid systems

PRODUCT FEATURES

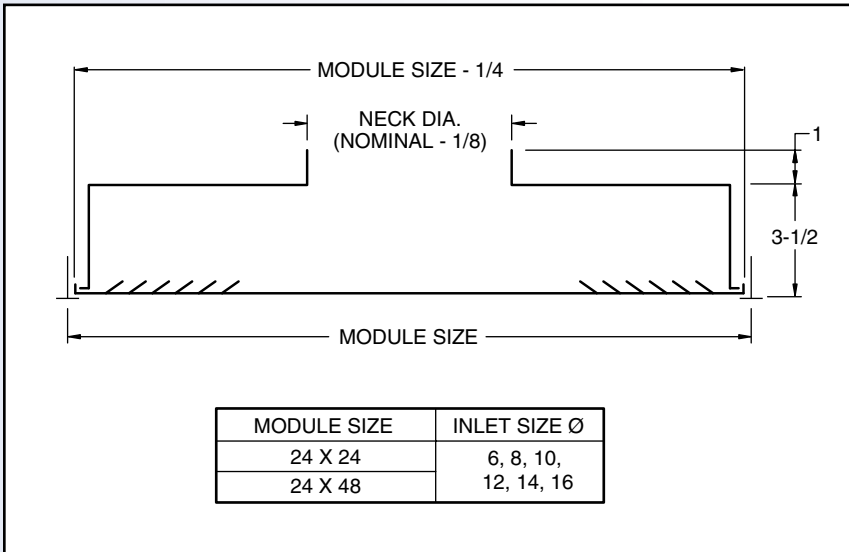

- Unique face design delivers a 360° horizontal air discharge pattern along the ceiling and a weak vertical discharge of air without creating drafts within the occupied space.
- Stamped directional apertures and perforated section ensure performance – no field adjustments required
- Steel face and back pan construction
- Arctic White baked-on finish – entire assembly

DIFFUSER OPTIONS

- Model MVA - no center perforations
- Blank-off baffles for directional control for 3, 2, or 1 way blow
- Optional Anemostat colors
- Custom color matching
- Model **VD** butterfly volume control damper
- Model **TBF** auxiliary mounting frame for hard / plaster ceilings
